

Spreadsheets that never balanced, replaced by a real general ledger

GroupFund

Double-entry finance platform for an alumni association

Swipe →

What needed solving

- 01** Money arrived through four separate channels and was tracked in spreadsheets that never agreed with the bank statement.
- 02** The group collects money it does not own — merchandise paid for in advance, funds raised to pass on to another year group — and counting that as income overstated what the association actually had.
- 03** Committee roles change every year, so access had to be narrow and auditable rather than one shared login.
- 04** Members wanted to see where their contributions went without the committee hand-building reports.

Built end to end

01 Double-entry general ledger

02 Payment drives

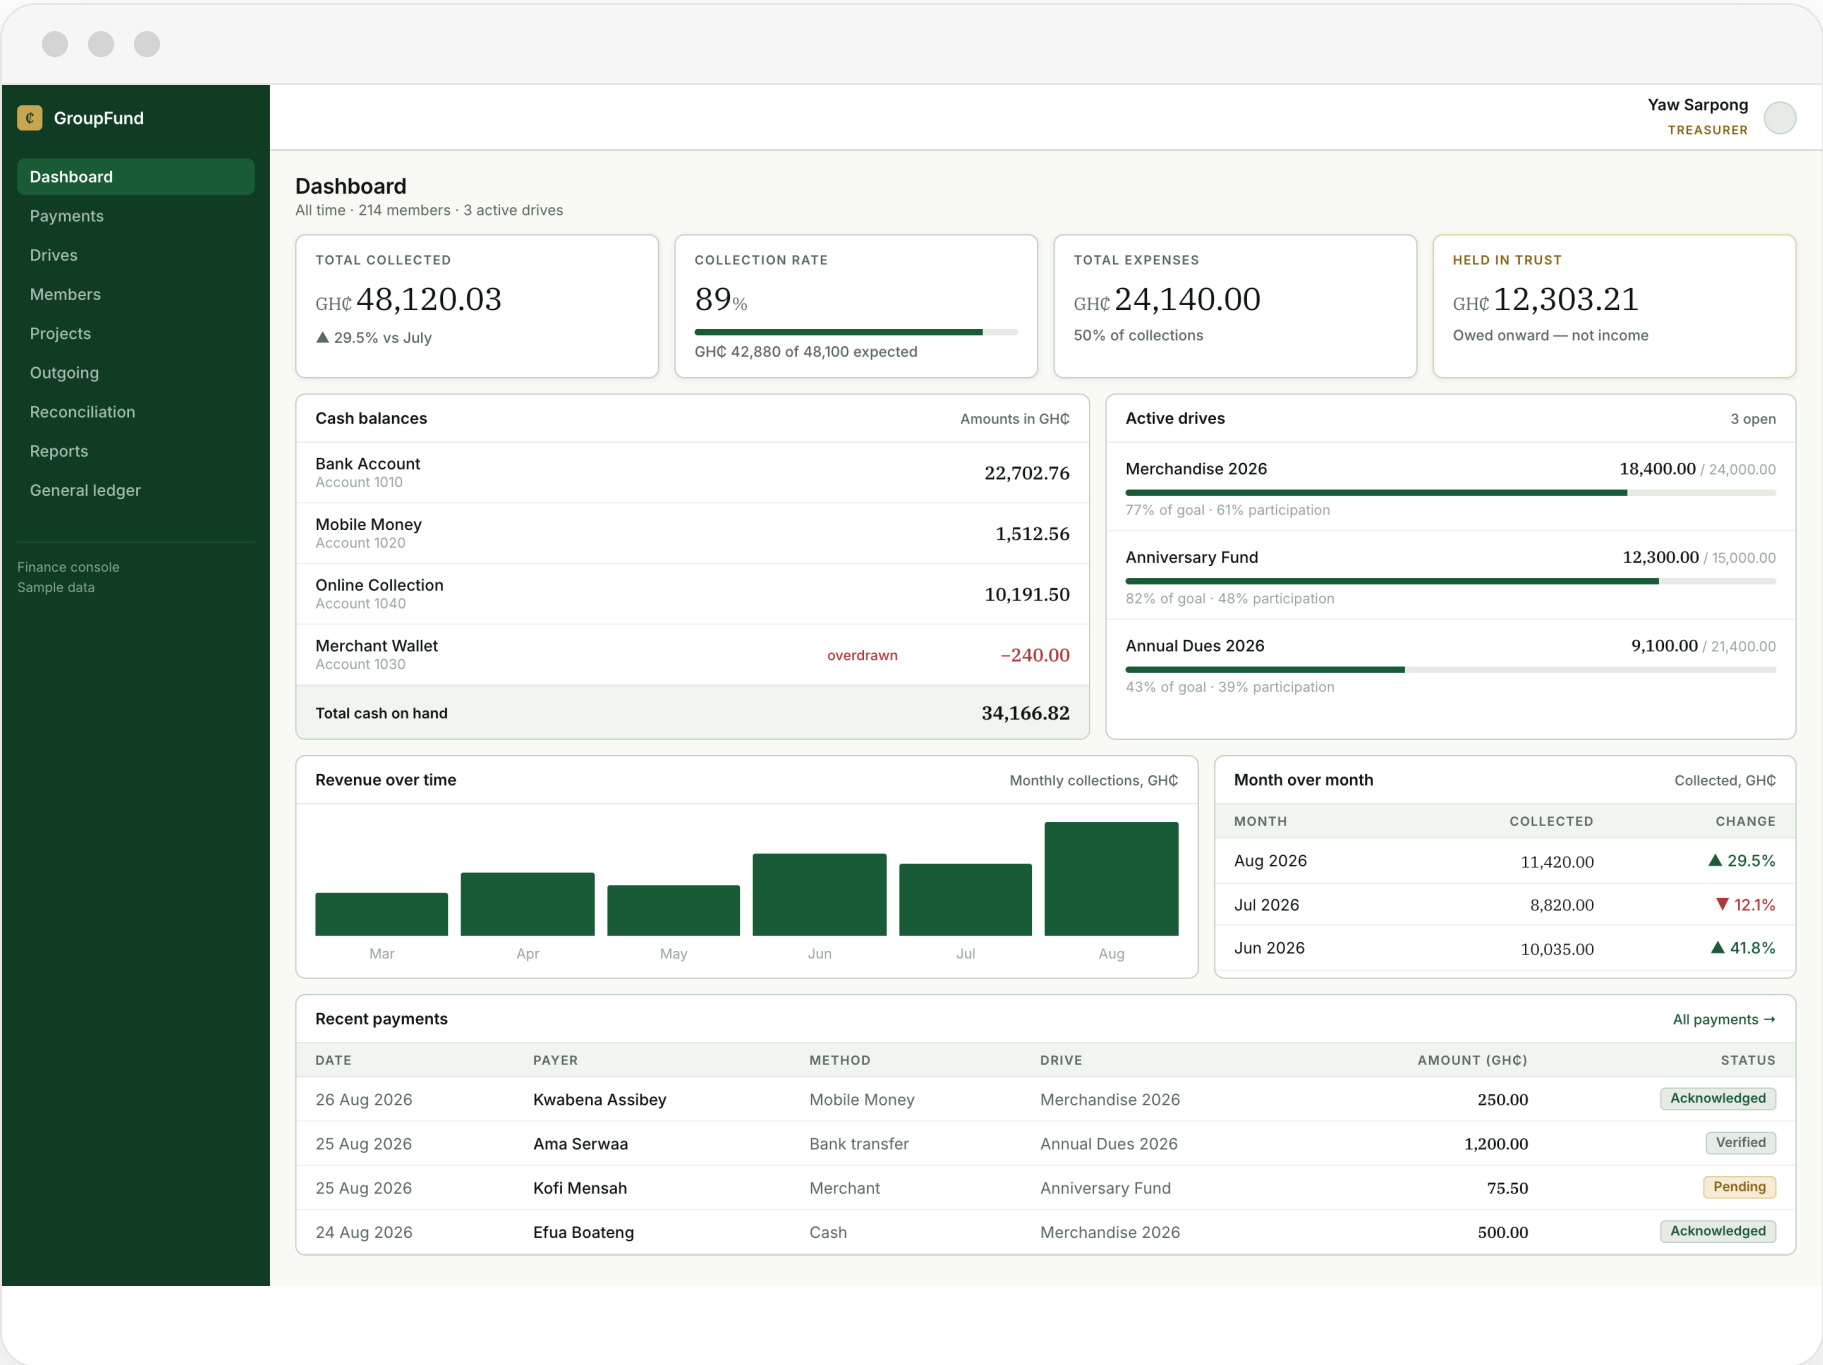

03 Three-step payment approval

04 Bank reconciliation

05 Funds held in trust

06 Member ledger and standings

MORE OF THE PRODUCT

Trial balance			In agreement · GH¢
ACCOUNT	DEBIT	CREDIT	
1010 · Bank Account	22,702.76	—	
1020 · Mobile Money	1,512.56	—	
1040 · Online Collection	10,191.50	—	
1030 · Merchant Wallet	—	240.00	
2402 · Venture Payable	—	12,303.21	
4040 · Contributions	—	23,009.61	
5020 · Bank Charges	1,146.00	—	
Totals			35,552.82 · 35,552.82

NET POSITION

GH¢ 21,863.61

Assets less what is held on behalf of others

Funds held in trust

Owed onward, GH¢

Merchandise prepaid Goods not yet delivered	4,120.00
Anniversary Fund To be passed to recipient	8,183.21
Total held	12,303.21

Trial balance in agreement, and funds held for others kept off income (sample figures)

Built to be trusted

- 01** Nine committee roles enforced in every server procedure, not just the interface.
- 02** Recording, verifying and acknowledging a payment must be done by three different people.
- 03** Corrections are reversals, never edits: both sides stay on the record for audit.
- 04** Signed payment webhooks, verified inbound email, and Zod validation on every input.
- 05** 73 automated tests on the accounting rules; type checks and a full build gate every release.

The outcome

21

double-entry ledger accounts; reports agree to the bank

73

automated tests on the accounting rules

9

committee roles with least-privilege access

144

server procedures, each checking its own permissions
