Professional Summary

Full Stack Developer who designs, builds and runs secure web platforms end to end: database, API, authentication, payments and interface. Production work includes an event registration and QR check-in platform, an alumni member portal and a double-entry finance platform, built with Next.js, TypeScript and PostgreSQL. Brings a background in banking internal control (Ecobank Ghana), frontline customer operations (Yango Ghana) and economics, which shows in the work: money that reconciles, personal data that stays private, and audited admin tools. Vice Convenor of APSU '16.

Key Skills

- **Frontend:** React.js, Next.js (App Router), TypeScript, JavaScript, HTML, CSS, TailwindCSS, Responsive UI/UX, PWA
- **Backend:** Node.js, Express.js, tRPC, RESTful APIs, Prisma ORM, PostgreSQL, Supabase, Neon, MongoDB, Data Modelling
- **Security:** Role-Based Access Control, Row-Level Security, encryption of personal data, audit logging, CSP/HSTS, rate limiting
- **Auth & Payments:** Clerk, Supabase Auth, JWT, bcrypt, HTTP-only cookies, Paystack API (server-side amounts, signed webhooks), double-entry accounting
- **Tools:** VS Code, Git, GitHub, Postman, Vercel, Sentry, Playwright, Vitest, AI-assisted development workflows
- **Other Tools:** Microsoft Power Automate, FLEXCUBE, SWIFT, Western Union, IBPS

Projects

- **Pretty in Pink Brunch 2026** — Event registration, payments and QR check-in platform for a charity brunch in Accra, live at prettyinpink.org.uk. Guests register, pay through Paystack, receive a personal QR pass by email and are checked in at the door from a phone. Personal data encrypted with AES-256-GCM, five least-privilege staff roles with authenticator-app sign-in for admins, audited reveals of contact details, 291 automated tests. Next.js, Supabase, Resend, Upstash, Vercel.
- **APSU 16** — Public site and private member portal for the St. Augustine's College Class of 2016, live at apsu16.com. 263 verified members find each other, RSVP to events, pay dues and post updates; executives edit content and review submissions themselves. Row-level security, server-calculated payment amounts, rate-limited membership lookups, 22% less JavaScript per public page. Next.js, Supabase, Sentry, Vercel.
- **GroupFund** — Double-entry finance platform for an alumni association (live, private). Bank transfer, mobile money and online payments post into a 21-account general ledger whose trial balance, balance sheet and income statement agree to the bank. Nine committee roles enforced in every server procedure, three-person payment verification, reversals instead of edits, 73 automated tests on the accounting rules. Next.js, tRPC, Prisma, Neon, Clerk.
- **Trading Desk** — Personal trading desk for gold, GBP/USD and Bitcoin, running locally. Six rule-based strategies send Telegram alerts with exact levels; open positions are checked against a live price stream every 2.5 seconds; every strategy change is tested on three years of history against fixed pass marks; AI gives an advisory second opinion that the code checks against the facts.
- **Leave Management App** — Built with Next.js, TypeScript and MongoDB: team leave planning with leader and member dashboards, shift-aware scheduling, leave balances and carry-over, and real-time updates. **Visit:** <https://leave-manager-one.vercel.app/>
- **Job Recruitment Platform** — MERN stack app with secure authentication, user profiles, job posting/listing with filtering, and notifications.
- **Weather App** — JavaScript weather app using WeatherAPI and MapTiler, displaying weather data interactively with Globe.gl.

Professional Experience

Full Stack Developer (Freelance)

Independent

Jan 2025 – Present

- Designing, building and running production web platforms end to end — database, API, authentication, payments and UI.
- Delivered **Pretty in Pink Brunch 2026**, **APSU 16** and **GroupFund**, all live in production, plus **Leave Manager**.
- Security built into every release: least-privilege roles, encrypted personal data, audit logs and signed payment webhooks.

Vice Convenor

APSU '16 (St. Augustine's College, Class of 2016)

2026 – Present

- Part of the executive leading the year group's alumni association.
- Built and maintain the association's website and member portal.

Full Stack Developer (Intern)

Edureka

Jan 2025 – July 2025

- Built and deployed a **Job Recruitment Platform** with secure user authentication, profile management and job posting features.
- Developed and deployed a **Weather App** using the MERN stack and API integrations (WeatherAPI, MapTiler).
- Created UI/UX projects including a **Netflix homepage clone** for responsive design practice.
- Implemented secure backend authentication with bcrypt and HTTP-only cookies.

Support Specialist

Yango Ghana LTD

August 2022 – Present

- Resolved over 40,000 customer support inquiries with a 93% satisfaction rate.
- Trained new staff members and provided continuous support to both day and night shifts, assisting in complex customer issues.
- Assisted in data entry for AI-based customer response systems, improving accuracy and efficiency.

Internal Controller

Ecobank Ghana LTD

Oct 2020 – Dec 2021

- Monitored system access across multiple regions and resolved daily operational issues.
- Led a 3-month document retrieval project improving compliance and data management.
- Conducted branch audits to ensure adherence to internal control standards.
- Trained employees on internal control practices and conducted system checks to maintain organisational security.

Education

BACHELOR OF ARTS (B.A.) IN ECONOMICS AND PHILOSOPHY**UNIVERSITY OF GHANA, LEGON****GRADUATED: 2020**

Additional Strengths

- **Controls and security mindset** — internal control and branch audits at Ecobank, carried into least-privilege roles, audit logs and encrypted data.
- **Finance and business literacy** — economics degree and banking operations, applied to double-entry ledgers and secure payments.
- **Leadership and community** — Vice Convenor of APSU '16; trained new staff at Yango and Ecobank.
- **Customer focus and communication** — 40,000+ customer inquiries resolved; explains technical decisions in plain English.
