Professional Summary

Full Stack Developer with hands-on experience building production-grade web applications using React, TypeScript, Next.js, Node.js, and PostgreSQL. Proven ability to architect and ship complete platforms end-to-end — from secure payment integrations and double-entry financial systems to real-time member portals and automated reporting pipelines. Skilled in API development, database design (Prisma, Supabase, Neon), and modern deployment workflows. Combines deep technical ownership with a product mindset to deliver reliable, scalable solutions.

Key Skills

- **Frontend:** React.js, Next.js 15 (App Router), TypeScript, HTML, CSS, JavaScript, TailwindCSS, Bootstrap, Responsive UI/UX, PWA
- **Backend:** Node.js, Express.js, tRPC, RESTful APIs, Prisma ORM, PostgreSQL, Supabase, MongoDB, Data Modelling
- **Auth & Payments:** Clerk, JWT, bcrypt, HTTP-only cookies, Role-Based Access Control, Paystack API (webhooks, HMAC-SHA512)
- **Tools:** VS Code, Git, GitHub, Postman, Vite, Vercel, Neon, Supabase Dashboard, MongoDB Compass, AI-assisted development workflows
- **Other Tools:** Microsoft Power Automate, FLEXCUBE, Swift, Western Union, IBPS
- **Other Strengths:** Problem Solving, Team Collaboration, Time Management, Financial Systems

Projects

- **APSU 16 Member Portal** — Full-stack alumni portal for St. Augustine's College Past Students Union (Year Group 2016), live at apsu16.com. Built with Next.js 15 App Router, Supabase, Clerk auth, and TailwindCSS. Features OTP email login, member profiles and directory, live fundraising project tracker with Paystack-backed progress data, PWA manifest for mobile install, and real-time sync with the organisation's finance system. Deployed on Vercel. Vist: <https://apsu16.com/>
- **GroupFund** — Committee treasury platform for APSU 16. Built with Next.js, tRPC, Prisma, and Neon (PostgreSQL). Features a double-entry general ledger, fundraising drive management, Paystack payment integration with HMAC-SHA512 webhook verification and automatic GL posting, automated monthly finance report PDFs emailed to the Treasurer and President, fraud detection scoring, member contribution tracking, and granular role-gated access (President / Treasurer / Secretary). Designed to scale to multi-chapter organisations.
- **Leave Management App** — Built with Next.js, TypeScript, and MongoDB, this app allows team leaders to manage leave requests and schedules. Includes role-based access control, calendar integration, and a clean responsive UI. **Visit:** <https://leave-manager-one.vercel.app/>
- **Job Recruitment Platform** – Developed a MERN stack app with secure authentication, user profiles, job posting/listing with filtering, and notifications. Integrated protected routes and user session persistence.
- **Bakery Website** – Created a MERN stack website with admin dashboard for managing content and orders. Implemented authentication and product management features.
- **Weather App** – Developed a JavaScript-based weather app using WeatherAPI and MapTiler integrations, displaying weather data interactively with Globe.gl.
- **Netflix Homepage Clone** – Frontend design practice project built with HTML and CSS, focusing on UI structure and responsiveness.

Professional Experience

Full Stack Developer(Freelance) Independent

Jan 2025 – present

- Designing and building production web applications end to end — database, API, auth, and UI.
- Leave Manager: team leave planning platform with role-based dashboards, SSE real-time updates, and 60+ active users.
- APSU 16 (apsu16.com): alumni member portal with OTP auth, Paystack integration, PWA support, and 200+ verified members.
- GroupFund: double-entry accounting platform with segregation of duties, Paystack webhooks, and automated monthly finance reports.

Full Stack Developer(Intern) Edureka.

Jan 2025 – July 2025

- Built and deployed a **Job Recruitment Platform** with secure user authentication, profile management, and job posting features.
- Developed and deployed a **Weather App** using MERN stack and API integrations (WeatherAPI, MapTiler).
- Created UI/UX projects including a **Netflix homepage clone** for responsive design practice.
- Implemented secure backend authentication with bcrypt and HTTP-only cookies.
- Managed deployment workflows, API integrations, and GitHub project repositories.

Support Specialist Yango Ghana LTD

August 2022 – Present

- Resolved over 40,000 customer support inquiries with a 93% satisfaction rate.
- Trained new staff members and provided continuous support to both day and night shifts, assisting in complex customer issues.
- Assisted in data entry for AI-based customer response systems, improving accuracy and efficiency.
- Improved operational efficiency through effective communication and issue resolution.

Internal Controller Ecobank Ghana LTD

Oct 2020 – Dec 2021

- Monitored system access across multiple regions and resolved daily operational issues.
- Led a 3-month document retrieval project improving compliance and data management.
- Conducted branch audits to ensure adherence to internal control standards.
- Trained employees on internal control practices and conducted system checks to maintain organisational security.

Education

BACHELOR OF ARTS (B.A.) IN ECONOMICS AND PHILOSOPHY
UNIVERSITY OF GHANA, LEGON
GRADUATED: 2020

Additional Strengths

- Strong understanding of UI design fundamentals
- Proactive problem solver and self-learner
- Effective communicator in remote, collaborative teams
- Focused on building scalable and secure applications
